PERSONAL PROJECTS

OLX Clone Website | HTML, CSS, Bootstrap, JavaScript

10/2024 - 01/2025

- Developed a fully responsive marketplace platform at **Okra Soft**, improving UI consistency by 30% using Bootstrap.
- Integrated dynamic search and filtering features to enhance user navigation and product accessibility.

- Optimized front-end code for faster loading times across different screen sizes.

Personal Portfolio | React, Tailwind CSS

01/2024 – 04/2024

- Designed and deployed a high-performance portfolio using **React** to showcase technical expertise and projects.
- Utilized **Tailwind CSS** for a modern, utility-first design approach, reducing CSS file size significantly.
- Implemented smooth animations and interactive components to provide an engaging user experience.

Carsales Website | HTML, CSS, JS, MYSQL, Bootstrap

11/2024 – 02/2025

- Architected a car listing portal for the **University Of Mianwali** using MySQL for robust backend data management.
- Engineered a seamless user interface allowing users to filter vehicles based on price, model, and year.
- Collaborated on database schema design to ensure efficient retrieval of vehicle specifications and images.

Befiler Clone (Tax Filing System) | HTML, CSS, Bootstrap, JS

10/2024 – 01/2025

- **Developed** a comprehensive clone of the Befiler platform at **Okra Soft**, focusing on a user-friendly tax filing journey.
- **Engineered** complex multi-step forms with real-time validation to ensure accurate data entry for tax returns.
- **Implemented** responsive navigation and interactive dashboards, improving user engagement by making financial data easy to read.
- **Optimized** front-end architecture using **Bootstrap** to maintain a professional, corporate look across mobile and desktop devices.
